

## LAURA ZHANG

385 457 0970    muyuanz@hotmail.com    LinkedIn@muyuanz    GitHub@hiyakawa    Website: hiyakawa.github.io

## SKILLS

C/C++, Python, R, Java, Kotlin, SQL, C#, JavaScript, React TypeScript, HTML, CSS

## EXPERIENCE

**Software Engineer Intern**    Utah Nanofab Cleanroom    May 2023 - Dec 2023

- Monitored and stored the run data of equipment using TypeScript, **Axios**, **Node.js** and **Google Drive API**.
- Cross-referenced run data and reservation data using Python **Pandas** to filter the users who failed to check out the precious metals and generate emails to the equipment owner.
- Developed and maintained an Android application to display live updates of users in the lab with **Retrofit** and **Ktor**.

**Apple Certified Repair Service Technician**    University of Utah Campus Store    Apr 2023 - Dec 2023

- Troubleshooted and determined disposition of defective **macOS** products and perform board-level repairs.
- Provided software technical assistance, hardware diagnostics and data transfer service to the University community.

**Data Scientist**    Amazon    May 2022 - Aug 2022

- Collaborated with vendor management to optimize data tidying processes and reduce manual processes within Amazon Fresh Japan node as a bilingualist in English and **Japanese**.
- Extracted and stored product datasets by web crawling using TypeScript and **Node.js**.
- Developed Python applications using **Pandas** to tidy datasets involving product and vendor information. Generated HTML emails to check in with customers using Python.
- Saved 8 hours of labor per week by implementing each program and contributed to the digital transformation of RBS Japan FLEX team.

**Data Analyst**    ZhuoMan Technology Co., Ltd    Oct 2021 - May 2022

- Analyzed and visualized market and campaign data using **MySQL**, **Impala** and R.
- Developed a web application to upload Excel files and visualize the data as dot charts with **Flask** and **D3.js**.
- Created composite indexes for **Clickhouse** database and improved query performance by 400%.

## PROJECTS

**The Blue Studio**    Oct 2023 - Dec 2023

- Developed an Android drawing application using Kotlin and created UI elements using **Jetpack** and **ViewModel**.
- Implemented user authentication using **Google Firebase** and social features (sharing and importing pictures) in an HTTP application server using **Ktor**.

**Learning Management System**    June 2023 - July 2023

- Implemented a Canvas-like dashboard for tracking students, teachers, and records in school using **C#**.
- Developed controller functions by Scaffolding and **LINQ** and communicated with servers by **AJAX**.

## EDUCATION

**Master of Software Development**    Aug 2022 - Dec 2023

University of Utah    GPA: 3.87

**Master of Engineering in Energy, Environmental & Chemical Engineering**    Jan 2020 - May 2021

Washington University in St. Louis    GPA: 3.58

**Bachelor of Engineering in Chemical Engineering**    Sep 2015 - July 2019

Tianjin University
